**Detailed Action**

**35 USC 112, 2<sup>nd</sup> paragraph**

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 15 and 17-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15 (and dependent claims) is vague in the use of the Markush language "a promoter selected from the" because the previous amendment cancelled all but one member of the Markush group. Since the language "selected from" implies selection from two or more choices, it is unclear what this language means in the context of a single choice (the promoter in the LTR of RSV)? Deletion of the phrase "...a promoter selected from..." would be remedial.

Claim 19 is vague in that it refers to "The method according to claim 15...". Claim 15 recites a composition, not a method.

**Abstract**

This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is

Art Unit: 1636

important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

In the instant case, applicants use the legal phraseology "said vectors" in the Abstract.

### **Oath/Declaration**

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

Non-initialed and/or non-dated alterations have been made to the oath or declaration. See 37 CFR 1.52(c).

Specifically, non-initialed alterations have been made to the Post Office Address of inventor Pascale Briand. Also, the photocopying the Declaration is very poor and parts of the Declaration are unreadable.

### **Miscellaneous:**

On Page 2 of the specification, the description of the Figures section should be designated "Brief Description of the Drawings".

No Claims are allowed.
